## LIBRARY.

This manuscript was purchased by the Feather Bureau in November, 1909, for file in the Climatological Division, from W. H. Lowdermilk & Company, Washington, D. C.; price \$10.00.

No effort appears to have been made to ascertain the authorship of the manuscript; or, if such effort was made, the result thereof was not placed on record.

The manuscript was deposited in the Library in February, 1915, at which time Lowdermilk & Company were unable to furnish any information as to its source or history.

RAKEBUOR

The weather at the beginning of June 1797 det in very warm and dry which continued evereas: ing till the 17th, on which day the Thermounter shood, we the shade, at 95° at they place, in Baltimore at the same, and in Philadelphia at 97 degrees, On the night of the 17th howar a tremendous stoven of Thunder and lightning accompanies with a very he avy shower of rain came on and next day, the 18th the Would got about to the North West, which produces a considerable degre of cold.

in so much so that I was obliged to strip off my Summer Coak and sleep with a Blanket at inight which has continued ever since I suppose it is now at least 20 colder than on the 17 th this 25st day of June . -June 22 A mild cloudy of ay with some rain In the evening rather close and water - Slight without a Blanket 23°. Morang warm and close with for which conducted into rain in the foundous, and towards medday cleaned up with a fine N: W: Wino which continued during the

June 14th The morning of this day clear with a fine agreeable Wind at North West which continued tell afternoon, when towards 4 Ochock it became calind, close I Sultry . -N. B. Eat new potators which were putty large for the first time this Season 25th Last night the wine having got about to A ll it was so cool & found it disagreeable to lye without a Blanket - This the day the Wine continued in that direction, but it was mild and about gridday very warm - The Evening is pretty cool Wins at N. Me.

June 26 th This morning was very aquiable Wind gentle and at N.W In the forenoon, however, it weres round to N. 6: V from that to 1:6. when it became my warm which still continues to be the case at half past 9 O'clock my usual hour of writing this Journal -27 the Very little lows during the whole of this day in the morning it was quite calm but there was a little breeze at S. b. during the formore, and died away again in the afternoon, when it became aftermy warm - The everying however is putty cool there being a gentle air at Ne West

June 27th Continue N. B. A few blaps of the byt no rain fell & 28th A very thich cloud of fog rose from the River Tolowach this morning, which entirely obstructed the new of Virginia - The windy were light to day and variable but what farevailed longest was the N. 6: - The weather 29 Huch another day as 30 th very clear weather and warm with a gentle breeze during the day at I E. We now want rain much

July 1, Exceptively warm during the formoun of this day and all half part 3 1 mo: but accompanies with a fresh bure at I. E. which made it tolerable - at that time the wind shifted to N. W. and in a little after afine Thower fell without any thunder which is a very rare thing at this season of the year-The Coming, in consequence, was very agreeable title abt bed time when it to so we warm close and sultry 2 Thy day was warm from morning to 20 clock Pom: when it began to thunden accompanied with alittle rain

July 2° Continues which continues about I hours and then it cleaned - The Evening is very agreeable low at 19. 6 and light 3 Warm during the whole of the day - ale 12 oclock there was a small shown of rain Wind about J. 6. but in the Evening perfectly calm We still want rain much Dry weather but not vory warm wind lung Voast Juck as yesterday Rais very much wanted reaching still dry but not excepenty warm. The graf brown, so much

July yet This day has been cloudy. In the morning there was a fine shower, due but seldom intirely fue from drigling -All the raine we get have has however, will have hat little effect if there is no more soon - The night. continues as the day was, very hayy - lours at N. 6: gthe This day was very war with little wind, and in the soming not a breath of air stating. - This is I think the warment night we have had this season got Afine agreeable day by reason of abouge from the will. which tempered the heat Rain still very wuch Wanted

July 10 th Dix weather stall. Windy war able - he the in the foundon up the Rever at 10 Oclock no wind at all With Last night there was some thunder and lightning, but no rain fill The wind this the day, was mostly at N.W. but notwithstanding it was warm 12 th Such as yesterday winds being at in with the evening when it was at S. E. and light The Country people are now complaining very much of the drought tit is generally Support it will linjure the

uly 15 - Continues I which encreased till about 12 O clock, when it became cloudy and an appearance this time was up the River but unluckely it got nown to N. 6: which soon dependent the clouds and with them the The afternoon Levening very warm but not so hot as 16 the Would this morning was from about East and continued in that direction all the formoon and part 1 Oclock P.M: it became

cloudy to the westivars and the appearance of nain encreased gradually till about half past 5 when the raw came on which was at first gull, but in half an hour aftern the wind shifted to wiw. when the first came on accompanies with a good deal of Thunder which continued till about 8 Oclock and then it cleared up. I runarhed that it rained for half an hour pretty smarty before the water beggn to run off the shuts . Indeed every thing was so exhausted of all kind of maistine that

I never sow such an appearage as the Country displayed. hope howen, the rain in time to save the Brop of Com, the leaves of which plant has become withered ely 17 th A fine limperate day Would at M. 6: \_ The effect yesterdays rain our the appearance of every thing in the fields is astonishing. Gestuday they care quite hrutty agreeable day

July 19th Such as yesterday and Wind in same direction\_ Rain wanted much yet and the Commons are again Looking browns 20th Awarm and dry day Wind at East Wind at S: B: 22 His morning was cloudy; and about the middle of the day it began to rain which continued about 200 3 hours, but very gentle -It will, however, he of service. 23, A warm sultry day -Wind about S: Cart\_ And a few drops of rain fell 24th Still very warm\_ Wind as yesterody

July 25 The wind to day has very acceptable having coole the air a good deal . -There was some rain last night here and am tols there was more to the northward 26 Avery warm and dry day . Wind alt & Sour 27 Warm in the forestoon and and as yesterday but in the evening there was alittle rain and the would got about to West which 28 This formore was very was way and little wind. About 3 O Clock however, there came on one of the

treasurest rains accompagind with Tunder dever saw which continued about an hour Soon after the raw hegan; the wind which was, prevent to it about in bask and gentle, shifted sichdenly to the Mi West and bled for about 5 Munuty harden, think, than I have seen in this founting but it as suddenly fell calm and got round again to the W: East There was also Some hail with The raw . - Now in the Evening it is calno an cloudy and the air agreeable

July 29. Gesterday nam has how the ffect of a ding the air much and this day, owing to that, and also him cloudy has been very agreeable The Humomater was to day at 19 30 th Au an realite day -Wind at S: bail 3 th The would to day a 1 bast - Cloudy an in the foring some nam and now in the nawing hard Aug This has been a raing day - Wind alst west 2 bloudy all day and My Showers going all Warm and sulty 3° This forerison was extremely close and warm. Abou

August & Some rain to day and the air putty cools got Avery pleasant day Would about Milo I cool It is wonderful the change that the commons around the lown have experience in couriginace of the late rains They are now covered with fine grap. -10th This day has also been very agreeable . The Wind in the morning and borning at West during the day very little or none 11 the winds this sonorung was at n: West, but in forenoon it got round to I; 6 and became warm not exceptively so

August 17 the pretty warms I to day, and hardly any would but what lette we has was from J. 6: - About boclock it began to rain gently which has continued all the evening wot some Hunder, and an appearance of, a good deal more 13 th Warm during the forenoon with a fine air up the River and about 1 oclock as Thunder Gest come on from the W: West but which was not very violent and of short continuance The alternoon was very agreeable I wind light and from

August 14th Last night was very cool in so which so of found it disagreeable to sleep without a Blanket Wind W: West 15th very each still for the season of the year during the morning - This the day, however the Sun was as warm as usual. The Evening too, is extremely cook resembling a night in the beginning of aloter .\_ Town h. west. N: 13: I was informed by a Gentleman who was, on this night amough the Mountains in Allegary County that he sady Indian Coon front but there

Aug 16th Last night Iwag? obliged to slay with a Blanker The day has also beens agreeably cool will will. 10 and at I. C. 19 th to 21st Waron settles weather Wind in West 22 Warm Still but in the afternoon we had a fine shower from the M: E: which cooled the air \_ 23 6 29 th Warm stilly weather, and a gentle air in the mornings from U. west, but generally during the day time the wind came round to S. bast: n B adhower world

now be very agreeable the Streets and roads being very dusty - During there few days part the rights have been agreeably cool, but during the day the Sur has has apowerful effection any 30th this day has been much warmer than any we have had for some time fast .not abreath of wound during the whole day - Mow in the evening, however, there is on a greeable air from the bast-31 st Such another day as yesterday \_ Warm and no which is also the case

now in the brown of this is as disagricable anight as we have has this dearn. Teht ist One of the holest days we have had they sea jon - due. I searcely think there was such a warm might as last during the Summer - that a breath of wind storing - Oring to that, the extraordinary clear state of the atmosphere and. the air is rarified to a great degree to This fourour there spring, up a bruze from the Willest and continued increasing till the afternoon when it was accompanied with Left 3. This morning there was some showers of rain from the West but diving the day it cleared up :- and, by the rain having cooled the air was very agreeable: N.B. Some few deaths happening by the Thep. -Whis morning was fritty cool and during the day agreeable Wind about west. 5th Last right of found it disagreeable to sleep without a Blanket, and the day is, as yesterday, cool - 10mo about n: East 6th Such another day as yesterday. bool, and Wind about north than the four preceding days. Sept 8th Rather milder than yesterday - Wind M. East gthe Such as yesterday Home variable but off the Land . Thermometer alt 68° at woon 10 the last raine we has seems to have put an end to all disagreeably warm weather - This day has been very agreeable Wind about W. East. 11th Such as yesterday 12 th Rather cooler this morning) than several days preceding, but during the day mild and a greeable, and little on us wind 13 th did not effect we would again have had any day Solute 13 th Continued they season so warm as they has been especially in the evening, which is very close and sulling - Wind during the day up the River, and now in the evening, none at all . -We want rain very much. 14th This day has also been warm a little rain in the afternoon - Leaste or no como. 15th Rather cooler to day and in the evening a good deal of ram - Wino S. East 16th A viry agreeable day . -Wind about west -17th Such, as yesterday www SE: 18 the n the foundow appeable. www alt fouth in the afternoon several squals of short continue; with very heavy showing

Sept 19 the This day has been very cool with a strong beeze in the forenoon at wi West in the afternoon 20th a very calm Lay- The lettle wind that we had. was from the S: E during the day, and now in the evening from n. East \_ M: 13: Hus Season has been remarkable for great abundance of good fruit especially peaching, which sold at 2 Cents a dozens\_ And it has been, and is at present very healthy in this Your and rughbourhow, but in Philadelphia, Bal:

Baltinore, Norfolk and Charlifton and some other places of less note, they have the vellow fiver which cuts off a great many people. Sept 21. An agreeable day with a guitte air up the River and now in the evening wind at h: bart. 22 Such as yesterday. 23. Hardly any wind to day and warmer than several days past, but not disagnesa. 24 the In the foundon of this day warm and hazy with a gentle air from abt north: and in the afternoon apretty smart breeze from Nant with an appearance of ram but there was very be

Soft 25 th This day has been warm owing to the cleanings of the atmosphere, there being us clouds to obstruct the Sun, and also to the stilling of the air, there scarcily being any wind, but what was, was from in west. h: B: By accounts this day from Philadelphia, the yellow fiver is growing works, and in Baltimore it is also said 26 th Pretty cool to day by reason of a smart bruze from W. West 27th Last night was extremely cool and continued so during the greater part of this day

Cept vy the Continued bruge at horth In the evening it fell calm but notwithstanding continued W. B: By accounts this evering the yellow five is increasing at Baltimore in an alarming degree in so much so, it has caused the half of the unhabitants to fly the lower More thank you, we are 28 tha muld pleasant day with very belile wind. 29th This day also agreeables. a gentle air up the Rever and warmer than several days part 30 The air very thick and hars to day with an appearance of The war light and at

October 1st Last night it begans to raw which continued allo the fournoun during which time the wind was at M? Goet in the afternoon the Wind veried to north and of the weather became fair-2 Avery clear day and warm wind at ! Each . By account this Evening from Baltimore the faver 3° A clear day and wind at & bast Desagreeably warm during the former hart of the day, but towards evening cooler, and an appearance This morning about day break, there came in a very heavy squal from Mo. Colif the Continued accompanied with raw about 8 Octock it cleared up, but the would has continued to blow all day very hard from to West, and it is frutty cool this evening: -The tour to day was from about ligest and not very high in the evening it was calm and will dearon with a gentle air who the Rever both days this morning which cleaned away about 10 oclock when I became warm with a pretty strong breeze up the rever \_ Now in the evening it blows very hand from ab thest

Och ythe book to day there being a pretty stiff breeze from hi w. N. B. The fever still continuing at Philad a and Ballimore. 10th Such as yesterday but the colo rather encreaging; and this evening has alittle fire on 11th the wind still at in west and very cold this day 12 the This morning there was a thich hour frost whom the ground - There was very little wind to day in the morning it was about new. but during the day it got round to a few points to 6: of worth, and the temperature of the air rather into how in the evening the

Och 12 Continued wend is again about new This is the first day we have has afire on the whole day 13th There was hour first again on the ground this morning, but in the foundow it became mile and in the afternoon a gentle breeze set up the River - The weather however, die not become so warm as is usual on a change of wind from north west to I. East and we had afire on the whole day. 14 th very cloudy all day and little wows, but which was from about East

Och 15th The wind this morning was gentle and from about west - The Shy clear, and very agreeable the Juch as yesterday, only this evening, altho the wind is very light, is extremely cow - It is at north west however 17th a gentle air up the River to day and mild -N.V3: The Season continues extremely dry; and the planty are complaining of the want of rain It is said that the Potomach, above tide water, was never known to have been so low as at present.

Colober 18th Rather a wild day, this \_ Wend about west and gentle -19th Such as yesterday but M3: Tobacco of this years growth came to market to 20th The wind to day has blown hard from the Basi and a good deal of rain has fallen 21th The wind this day as yesterday and a light drighing raw. Nowin the evening the ween has got round to u west and still continuing to rain 22 The Wind this day at he west Col 23 dvery heavy rain all day and bound at Weart 14th An excusing alovery day In the forenoon the wind was as yesterday, but was the afternoon it got round to about north and hillest. 25th Afine pleasant day north West \_\_ 26th This has also been a very agreealeles day and a gentle aur from about East wow we have is from the west and cold, as has been the case for several nights past In B. Phy this nights hery papers the yellow fiver

Och 27 the Those has been a prilly stiff breeze from about South to day Mow in the evening of has fallen off, but still a little air from that quarter - The 28 Hzgh apretty cool weather both days wins north wester\_ 30th very cote to day and as strong breeze from Wellast 31st Rather milder to day - The wind, altho wwest, not how I to 30 Fine agreeable warm weather for the season of the year lows light and at South Cast was untillade Mattinove is enterely gone

Nov 4th The weather still extremely worm for theseason of the year - There was a thich fog this morning, and in the afternoon it began to rain guilty from about East, and now in the every it rang hard - This might is remarkably warm indeed 5th His morning and formoon was infact to me disagree! : ally warm The wind at they time was at south, but in the afternoon it began to rain hard and the wind ovon after got round to n: the blowing very hard, and it as usual became coto and the weather clear

Now the The wind this found on was at about South but cool . - On the afternoon\_ it began to Snow a little from same quarter, when the would changed to M: W: which still continues get A hard frost last night, and colo all day - Wind Wilo. 8th This day the Wind change to S: E and the weather became warm gth The wind light and about West and the air agreeal 10th Wind to day about worth and putty cool 11th A light fog all day and the wins about it. East and gouttle

how not Last night it begans to rain very how and continued till about 10 Octock to day - Wind about South and warm 13th wind as yesterday - fair dud very warm for thesease. 14th This found on the wind blowing hard, and it in consequence soon became colo. 13 the His morning there was some snow which lay ashort time on the ground, and an appearance of more alliday lows will and very cold. 16th ahard front deour as yesterday 17th Agood deal of suring fell this morning, at which time the wind was found about

got 17th Continued South blowing hard and very cots. Now in the evening the Wind is at I west and about first 18 th Wind light and variable all day - but frost still 19th Wind W: W: and a good deal Asion 20th Wind al 1 East and raining all day which fueres as fast as it falls above the Snow The earth is entirely covered with a coat of ice 21+22 Such as yesterdongher oth W. B: Giving to the snow and the rain for these three days fuzing as soon as it fell, a great many willow Trees are broke down

how 23, Hanny all day, and the Snow and de now gone. 24th Last night the wind got suddenly round to to west and blue a trumendous storm for awhile - During the day it was also high and as 25 the This day there has been very late wind and variable, and the frost less sweet than yesterday 26+27th lows at newest, and hour frost both days 78 Such as the preceding two days only the frost during the day Rever yet but there has been alittle several mornings along the Shory which the Sun deling The day always metter

Nov 29 th wind as yesterday and the frost very suice to might have been and 30th duck as yesterday and the colo encreasing. Last night the water from freth thick in the house for the first time this Leavon Lear The Wind very light to day from to West and not quite so colo as yesterday-2 1 3 Raining both days - Wine at No bast ... 4th Last night the wind got suddenly round to he West and blew aviolent storm which has continued all day, and a much harder frost than has been this season

Decrist The first was so since last with that, alto there way is ico on the River yesterday except a little at the drives, it was they morning completely fearen over even to below Alexandria The Thirmogniter of think could be higher than 8 or 100 - The wind however to day was light and at West and d: West and the first not so very severe Now in the Evening is at N. West The Wind Light and about to Such as yestuday N: 13: The people skea over the Rever to

Decrath Wind light and about Stast Frush weather and avery little rain. The ite here towww Still fast but your at Alexandria 9th Last night it finge very hard again, and the Wind during the day was at will. 10th Juck as yesterday and wind my same direction. 11th Living this day the weather was fush, but in the evening, frost again and a gentle air at N. Weest 12 Frust weather to day again while the Sun was up good wind about East In the evening however it is, as last night, front and wound at

Dec 13th Very wild to Lay for the Leason and a goutle air from about S: East. 15th Last night the See broke up a little but it is still fast above the Island opposite to Georgetown The wind during the day way very quite from about East Now in the Evening it has got round to to West and blowing a very heavy gale Here was a good deal of ram to day 16 th The low this day at n: West and frost 17th Fruit weather and hary Wind vory light and from

Don't get Last wight all the See went away . The wend stiff, expecially in the evening, at A West and an aptramo hand fint The fact was so some lask night as to cover the Mine again to below Alex a The day however, has not been you very cold, the lows bung about di East \_ 20th The wind this foundon was very light and as yesterday. But it got nound, without any raw, which is seldow the case to so West, and it now blows a tormendous storin from that quarter; and the an oftruly cold .

Dec 21st The would continued to blow all last night a dreadful storm from N. West, and it has continued all day in that direction and by much the hurdest first we have has this Season - It is so severe that the ink fures in the from at three yards distance from a strong fire. 22 10 mo still as yesterday but not quite to high, and altho extremely cold not so much so as yesterday 23 Wind still north west and colder than yesterday -24 th vory little or no wind and not quite so colo as susterday 25 th low variable and hard

Dec With This day the sound was from about S: East, and " ythe wind in East in the morning and at to West in the evening with frost all day -28th Very little wow during the day, the now in the evening it blows a guitto breeze from In west and ahard frost 29631 Such weather as the 28th 1798 during there three days Dany it A viry thick fog this I morning and hazy allday Little or no wind and fresh weather 20 blear frosty, weather, and a guitte bruge at about 3 Such as yesterday \_

Sanuary 4th There has been a constant and very heavy sain all day and now in the evening snowing wind at Snorth bout the Front to day and a gentle brugh from about by 7 th Such as the 5th but the frost very gentle gth A good deal fram to day \_ lound wariable, but generally from als & East 10th Avery pleasant day the weather bring clears with a slight front and wind worth west 11th A smart frost to day would west

January VI Tich as yesterday but not so cold, and liend Wind as yesterday and mild thro the day, but y the evening alittle frost 14th A very calin day - loanner than yesterday and no frost this evening W. B. The Sce on the River is a foot thicks the There was no front last night, which is the only instance of furt weather during 24 hours running since the land hard front set in - The long to day has been from I bast, and raining hard sence about 10 Oclock A. Wil

Samay 16 th Thur was a little frost last night and the Lay has been very a greable lows light and about Steret 14th Huy morning the Sce broke away here, and it has contin ned all day to come down the River together with wood, in immence quantities. A broke away at Alexandria I believe in 15 ant The day has been agreeable and wind about west The fresh on the River as well of on the breeks und Kung is extra or dinary great 18 th 21st Agreeable Winter weather tring there being a gentle front during the nights and thro the day, by reason of the Sun

Jany 22 Joine name this day from & East, and much warmer than some time 23 swas very much surprise this morning, yesterday being so warm, to see the earth covered with snow at least 3 or 4 inchy thich - There has been a very severe frost all day and still continuing\_ lows putty strong from hill. 24th A hard frost all day and wind as yesterday? 25th Wend to day about Earl and a cold raw day \_ 26th lound as yesterday time raning most of the day

Sant 27th Still soutining to to rain, Wind about u. 6: but since 3 Oclock the wind has got round to West, and snowing -18th There was a very sweet frost last night, in so much so that it nearly covered the River with ice - The day, has also been very colo lomo ath: West. 29th Avery hard frost still and the River to mean Alexandrica completely covered with dee -30th Not so colo to day, but now in the Evening frost again - Wind light and wariable Il Such as yesterday

Hehr, 1st Mild and agreeable weather for the Season of the year, the during the nights always from The 2+3° such as the 1st 4 th Hary to day and little or no wind, and not sopleasant as some days part -3th Last night about 10 Oclock there came on a violent gale of wind from about lost which continued all night and they forenoon, but now in the evening it has fallen off - The weather wolwithstang was not very cold 6th A pretty agreeable day & www light and variable

Heby you There was souse name this morning, at which lime the wind was from about Gast but during the afternoon, it got round to A West blowing fresho and may cold. the There was avery severe front last night which has continued all day long at mi weel the Juch as yesterday, and there is now a good deal of Ice on the River - The www about North or a few points to Castivais of it otherames as yesterday. The de on slanding Water bearing to relay day, a little milder than some days past, but have find l- lo his alt bot of oak

Heby 12th Still milder than I yesterday 13 During last night the weather became saddenly cold and this moving there was Snow laying on the Ground The day has also hun cold louis at horth East, and surving again this Evening 14th very sure frost last night and thro the day blowing extremely has from h. West 15th years frost still 10 ms about now a considerable effect during the day time altho the first in the night time is still very sweet 16 to 18, Would during these 3 days from about month or about or two to eastward fit build and stiggly brure blear weather and

cheby 19 Wind this day at Worst In the formour cloudy but hard frost, and in the after. noon there came on avery heavy hail of the hardest quality think I ever daw resumbling pieces of Jee more than Snow, and still continuing 20th Frish weather this morning and ranning greatest part of the day - wourd in boast and fight 21th Such as yesterday - range 22 Frost this morning, and by neason of the dun showing the day - wind willed 23 very thich weather in the fore: mon den the afternoon raining haw - wind all N Earl

Febry 24 th A dull day and hale or no wind, but fush weather. In B. By Lettery from Philada the Delaware was shut up by See on 19th burt which was not the case with Potok 20 Rawing this four our but in the afternoon it faired -Wind Mill! and a gentle fint 26th An agreeable day somo bight and about with ... 27th Juch as yesterday 8 th ongwing the greater part of this day - lows light from North East Mar: 1st A thich fogy moving, but it cleared away in the foundon, and in the afternoon the wing blue very hard from abt west and the conting,

March 2 This morning there was a pretty liand frost Eloudy all day, but now in the wining clear and a genthe frost would light and July Fast. The 2-Stoff flear and warm weather dering the day time, but always aguitte front at night 8th There was no frost last night and the day has been so wild there was no occasion for a fire, except in the evening which is alittle cool, but not near front, moleund light and at Mast 9 to Such as yesterday, the not quite so warm-clear weather and a quitte bruze from A Bark

March 10th This day sway so waring that excepting in the morning we has no fire on all day in fact there was no occasion for one in any part of its The weather was salittle foggy but which did not interript the Sun from shining - and wind gentle at I! bast . This morning was likewise very warm but doudy, and towards 20 clock Pin: there came our a very heavy rown and a hard gale of wound from about west which continued meanly an hour when it faired till whout Oclock when avestent fact for this time of the year came on accompanied with some

March, 11 Montines Thunder and it has continued raining since 12th Last night the wind blive from Mest a most tremm: doug storm, and continues from same quarter all day the note so brolent as through the Aught - The change of the temperature of the air, immediately on the shifting of the wind, was very great indies, it being front and the two preceding days 13th The wind got round last night to N bout and not voy Strong Through the day it veines to Mantagam and the weather altho a little cold was putty agreeable

March 14 th Jame Severe I qualy of wind from west and I: West to day and in the evening quite calind 15 the west and colo. 16th Such as yesterday - Froit during the two preceeding The wind got round to North East this day - The weather thick and not so cold of yesterday -18dight Such as the 17th noth A good deal of rain this day and wind variable 28th Raining very hard this morning but towards 10 Oclock it faires and became very worm However it began to rain alittle again, when the wind shifted to he wast and blewaning March 22 The wind continued to blow all night from in week in a triumdous mariner It has also blown all day from that quarter but not so high I and it is putty 23° An agreeable day - loud light and variable \_ Front last night. 24th Wind this morning and this the formoon from all East blowing hard accompan ied with a beavy rain but in the afternoon it shifted to West and be came agreeable 25 the This was a very pleasant morning, but this the day there in the evening, the wind, which

March 25 Continue was in the former part of the day about West got round to Nevert, and has and now is blowing hard -26th wind in west but light, and altho cool rather agreeable 27 A very pleasant day wind about west and gentle 28/29 Such as the 27 to only the wind from East and 30th Nery warm this day, wind gentle and from O: East. 3 gst Warmer still than yesterday In fact it was disagreeable walking in the dun shine to day - Wind as yesterday Apr 1th This day fully warmer than yesterday - It resembly a day in Chay

April 2 Last night I slept with only one Blanket, but lowards morning, found it too little, for the would has got round to M. East and round a title which encreases all day to now in the Evening raining excepively hard from same quarter, and putty cold 31 The rain has continues till now, 10 o'clock Pm: but it at last appears to be fairing and the wind shifting, as it at present is blowing very hand squals 4 the wind continued to blow Iron N. Bash very hard last might and all day accompany W. B: Peach Trus intoloom

April 5 th Cloudy all day but no ram, and the wond nearer east than for some days part The Afine clear day wind quite and from about worth yth This day cloudy Wind still continuing to shift alittle but never for from north East there sweral days There was some rain this morning but it soon cleaned up, the wind geting round at Jame time to M West, anda gentle bourge got Afine clear day - Wind light and about S: East Such as yesterday during the former part of the day, but towards evening It became cloudy and is now ranning

Afril 11th A cold rainy day wind about East - 12th Squally all day and flying Thowers, I believe the hos blown from almost every point in the compass und the sin 13th Such as yesterday except that there was little or no rain to day, we have had afore on these several days 14 th Some very severe squals to day from about west but the wind has now got to willest blowing asteady bruze, and cold -15 Wand as yesterday blowing fresh, and extremely cold for the Season of the year

April 16 Last night it was a little - The day has been very cool too; and am afraid this night will blash our hopes of having any preachy or Cherries this year, althobut a day or two ago we had a very fine prospect of a plentiful harvest of these If the There was away sweet fort under last night in somech so as to fuzze water one haff an inch thick - The day has also continued very cold blowing hard from Willet yesterday when the severe

April 19 th Continued cold came on the Dky, which for the most part is very clear during in west winds, became completely overclouded and continued so all day Last night and they day was rather mulder than the preceeding, but it was still cold till the evening when this haid Spell of worth West winds Subsider, and grew perfectly calm All the finit except apply perhaps are certainly gone May wen the leaves of the Willow Truy are quite witheres and blasted \_

April 19 th Afine agricable day, clear weather and a quitte beerge from I bast 20 th A cloudy day and alittle rain in the evening, but upon the whole putty agreeable wind South East -21th This foundon very pleasant, but there was a gust and some thunder in the afternoon 22 Wather an agreeable day altho altill cool, who bung at Nest-23 + 24 Cool weather, and wend light from In East both days N.B. The fuit, altho a good deal injured by the late severe weather, does not appear to be so completely

distroyed as was expected of was fortunate every thing was voy dry previous to its coming on, or they much certainly have all prished. April 25 M A warm day - Wind light and from S. Eart 26to 29th Such weather as the 25th with the heat gradually encreasing, and wind in same direction -30th Extremely warm this day and very little or no wind but that little still S: Earl May 1st Warm weather still continuing and Wind at South East 2 There was ashower last night which was very agreeable - The day however has been warm down as yesterda

May 3 Such as yesterday, only 4th Such weather as we have had for some time past -5 th The fourour of this day was clear and warm, but there was some rain in the afternoon and a little thunder and astrong buye from to lost, but it was scarcely as much as might be called a gust. Last night was the first of sleft without a Blanket this Season 6th Rather colder this day, wind bung at N west yth Juch as yesterday

May 8th & got Dry weather but not very warm, wand bung at Mr. West both days oth A dull day Windlight and from de back -11 buch as yesterday, but so very cold that altho we has not afire it would have him agreeable -Wind nott East. 12th This day still colder than yesterday, and last night was obleged to lay with a pair & Blankets - Wend bish from N. West 13th Still cold for the Leason of the year but not quite so much so as yesterday Rain much wanted.

May 14th A pleasant day as to the temperature of the air, but the Strutz and roads owing to the day weather are viny digagnerable low light and of heart -15 to 18 Such of the 14th Hair wow wanted very much indeed, but at prient there is no appearance of a change of the weather 19 the Dry, weather still Wind in same direction as some days hast. 20 th Very warm they day - Dund light and and back 21st This day has been the warm. : ut we have has this Searon and altho there was no rain

May 21st Continuo I we has alittle appearance of it which alove way. agreeable 12 We has a slight shower the forenoon from I: West which Scarcely law the dust 23 This forenoon was very warm war about I bash but it got round in the afternoon and there came on a gust from Must when there was a good deal fram and some Thunder 24th Raining gently, the greater part of this day and now wariable 25th Such as yestuday, but it clear of up not the

May 26 apteajant day Wind that and at Niver 27 the the Such as the 26 ths 29 to 31th Clear weather and wind from It bart The heat gradually encreasing know pretty waring this thesuights are still agreeably cool. Fund which weather as we have has for some days hart and wind Still & Bast 2 Last night I Slept without alBlanket being wuch warmer than for some time before loins as yesterday 3 A very warm day indeed \_ believed back and light. 4th There came on guery severe stoom of thunder and lightening last night accom

June 4th continued accompanied with a good deal of an and still continuing with a constant thundering and lightening but the wind has calmed 5 th Some Hunder this day, but not so wind as yesterday and alittle rain 6 th duch as yesterday our putty worn - wind hightoware all ythe cair weather this day and warin letrus light and 6. 8th gth Both days such as the just 10th A ving agreeable day being cloudy and no rain land N. Each 11th This morning it began to rain yently, and has Continued sol all day Wind

June 12 th Hairing continually all this day low asystema 13 the has been avery warm day - clear weather and wind about di West 14th The warment day, we have have they Leavonblear - and wind abt. back 13th Lully as warm as yesterday and wind in same direction 16th Not quite so warms as afine breezes from about N. Gast and cloudy 17 buch as yesterday and wind in same directions 18 th There was some rain to day \_ wound as yesterday

June 19 th This has been avery rainy day; the temperaturae of the air however, agreeable Wino N East 20th This day has also been a very rainy only \_ In fact I do not remember to have seen at this search of the year, such constants and heavy raing as there has been for some days. hast. The wind variable but mostly from North East.
